Inventing a Sport

It's time for a new sport to be invented and as the youngest generation, it's your job to be creative and come up with a new game for this world. The last sport to be invented, out of all the major sports, was basketball and that was in the 1890s. What going on? Can't we think of something new?

We're talking about a cool new game that involves a point scoring system like hockey, soccer, football, basketball. And no... ultimate frisbee (frisbee + football) does not count where you mix two sports together to make one new one... we want something completely unique!

Step by Step

1. Decide what kind of sport you want. Is it played in water? On a field? Is it about accuracy or about speed? Is it an individual sport or a team sport?
2. Pick a name for your sport.
3. Make a design of the field it'll be played in. If it doesn't really matter where it's played, then make sketches of the things that are needed, such as in soccer, all you need are two goals, boundaries and a ball.
4. Come up with basic rules: how many players, objective, how to score/gain points, what the main methods/steps are etc. Be sure all the players have specific jobs, and that each one contributes to the game.
5. Draw the ball/racket/uniforms needed to play your sport. Sports involving balls must have a specific design for the ball. Some sports need specific uniforms. Some have a specific shape of a racket. Be creative in thinking these up!
6. Time to play!! If you can play with your family at home! Let me know how it goes.
