

HISTORY Home Learning Project

History is the study of events that have happened in the past. When we think of history, we need to place events **chronologically**. This means placing events in order of when they occurred.

Your project is to create a chronological timeline based on your life. Think about any key events that may have occurred. E.g. birthdays, moving house, starting school, the birth of a sibling. You can be as imaginative as you want to display your timeline.
